

Our Services.

*Julian, Kevin and their **foamfast** team love what they do and have created hundreds of different looks, courtyards, feature walls, pool enclosures and lots more.*

Fencing & Walling

All the benefits of a masonry wall without the time & expense of building one.

Cladding

Our cladding system is reinforced, lightweight & insulated for use on exterior walls.

Slats & Gates

Our slats & gates are made to order, quick to install, cost efficient, and reliable.

Veneers

Inspired by nature. Australian designed, Australian products, Australian manufactured.

Accessories

Supplies for attaching, sealing, rendering and trimming. Plus cut your own custom shapes!

Do it Yourself

Convert your dreams into designs, perfect for your location, climate & function.

Your imagination is the only limit to what you can build.

We are a group of experienced, professional builders.

Creative Concepts
Australian Products
Locally Manufactured
Quality Materials

Beautiful & strong, locally manufactured products.

Why Choose Us?

We'll give you a positive experience and you get the result you want, quick, easy and best of all - drama-free!

Foamfast uses the latest generation of locally manufactured products and materials, ensuring the best quality and the best value for you.

Foamfast rendering services are a quick render job using only the best Australian made materials designed to withstand the harshest Australian climates across all locations.

Use a **foamfast** building panel system of outstanding thermal properties, then you will also find the added bonus of cutting thousands from your current energy costs.

IS DIY YOUR THING?

Our fences are prettier than our faces.

Our **foamfast** lightweight walling is sometimes referred to as polystyrene cladding, polystyrene walling, insulated wall cladding, foam cladding and render panel or rendered panel.

Key Benefits

- Speed of application
- Reduction in on-site cost
- Ease of application
- Locally manufactured
- Insulation (energy efficient)

Applications

Residential rendered panel fencing & walling is used on all sorts of sites and can be used in some situations where block or brick isn't possible or is not economically viable.

Construction

Constructed of lightweight fibreglass reinforced composite panels, supported by galvanised steel posts, creating a solid, strong & easily constructed rendered wall or fence.

All the benefits of a masonry wall without the time & expense of building one.
